DOMINION OF CANADA

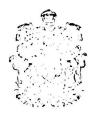

ANNUAL REPORT

OF THE

DEPARTMENT OF INDIAN AFFAIRS

FOR THE

YEAR ENDED MARCH 31 1935

OTTAWA
J. O. PATENAUDE, LS.O.
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1935

To His Excellency the Right Honourable the Lord Tweedsmuir, G.C.M.G., C.H., Governor General and Commander-in-Chief of the Dominion of Canada.

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Indian Affairs for the fiscal year ended March 31, 1935.

Respectfully submitted,

T. A. CRERAR, Superintendent General of Indian Affairs.

OTTAWA.

PART I

REPORT

OF THE

DEPUTY SUPERINTENDENT GENERAL OF INDIAN AFFAIRS

FOR THE YEAR ENDED MARCH 31, 1935

REPORT OF THE DEPUTY SUPERINTENDENT GENERAL

OTTAWA, Nov. 1, 1935.

The Hon. T. A. Crerar, Superintendent General of Indian Affairs, Ottawa.

Sin:—I have the honour to submit my annual report for the year ended March 31, 1935.

Since the publication of the previous annual report there has been a slight but general and sustained betterment in the economic condition of the Indians throughout the Dominion.

In New Brunswick increased lumbering activities have lightened unemployment among the Indians in the northern part of the province.

The Indians of the settled parts of Ontario and Quebec have felt the benefit

of increased prices for farm produce.

The grain-growing and stock-raising Indians of the Prairie Provinces, who have advanced rapidly during the present century under departmental supervision, have withstood the years of depression relatively well, owing to the advantages that they enjoy through exemption from taxation, mortgage principal and interest payments and other charges such as are borne by the white farmers and ranchers.

In British Columbia the Indians engaged in the coastal fisheries, who have suffered severely in recent years, experienced some amelioration due to higher prices and in certain areas larger catches.

The Indian mixed farmers of the interior of British Columbia, like those in

Eastern Canada, have benefited from higher prices.

The hunting and trapping Indians on the whole enjoyed a large catch which they disposed of at profitable prices.

PRESENTATION OF THE KING'S JUBILEE MEDALS

Among the recent events of interest from the view point of this department, special mention may be made of the presentation of the King's Jubilee Medal to a number of His Majesty's Indian subjects in various parts of the Dominion in recognition of outstanding services on behalf of their people and the State.

A list of the recipients so honoured, by provinces, is as follows:—

Prince Edward Island....John J. Sark, Lennox Island.

Andrew Maracle, Tyendinaga. Robert Marsden, Christian Island Agency. Alfred McCue, Rice and Mud Lakes Agency. John Bigwin, Rama Agency.

Saskatchewan......Rev. Edward Ahenakew, Ahtahkakoops Band, Carlton
Agency.
Andrew Gordon, Qu'Appelle Agency.

Andrew Gordon, Qu'Appelle Agency. Daniel Kennedy, Qu'Appelle Agency. Pierre Harper, Onion Lake Agency.

British Columbia.......Chief Baptiste George, Osoyoos Band, Okanagan Agency.

Mrs. Kate Dudoward, Skeena River Agency. Harry Stewart, New Westminster Agency.

Loyal addresses were tendered to Their Majesties on their Silver Jubilee by the Six Nations of the Grand River, Ontario, and by the Blackfoot Nation, Alberta. A ceremonial dancing robe was presented to His Majesty by Chief Edward Shakes of the Kitkatla Band, Skeena River Agency, B.C. This robe had been in use for five generations, but, notwithstanding its age, it is perfectly preserved and its design and colouring are of singular beauty.

It is noteworthy that the Indians did not receive their medals as members of the community at large through local authorities, but that His Majesty was pleased to treat them as a separate and distinct racial group through the Department of Indian Affairs, which, it may be mentioned, did not presume to make

any suggestion in the matter.

This procedure follows the traditional policy of the Crown in its relation to its Indian wards, who, since the inception of British rule in North America have ever been regarded as a special and separate responsibility of Government.

From the time of the first British settlement in New England, the title of the Indians to lands occupied by them was conceded and compensation was made to them for the surrender of their hunting grounds. The Crown has always reserved to itself the exclusive right to treat with the Indians for the surrender of their lands, and this rule, which was confirmed by the Royal Proclamation of October 7, 1763, is still adhered to.

In 1670, during the reign of Charles II, instructions were given to the governors of the colonies, which, among other matters, directed that Indians who desired to place themselves under the British should be well received and protected.

There are still of record numerous agreements and treaties, dating back as far as the year 1664 and made by the British with the Indians of New England, while Canada was still under French Government.

Later it was found necessary to establish an Office devoted solely to the administration of Indian Affairs and in 1755, Sir William Johnson was appointed

Indian Superintendent with headquarters in the Mohawk Valley, the country of the Six Nations Confederacy in what is now the State of New York.

Following the Revolution, the Office was removed to Canada and the title of the position was changed to its present form—Superintendent General of Indian Affairs. From that time on a continuing administrative organization has been maintained for the protection and advancement of the Indian interests.

HEALTH OF INDIANS

The year under review has been a very uneventful one from the standpoint of ordinary disease and accident. There have been no large epidemics of major communicable disease, but measles and whooping cough have been widely prevalent, causing some loss of life among small children.

The service has been extended by the appointment of a medical superintendent, who also acts as Indian agent, at Fort Good Hope, in the lower part of the MacKenzie River valley. Formerly there was no medical officer between Fort Simpson and Aklavik, a distance of some 700 miles. The first duty of the new officer was to relieve the medical superintendent at Aklavik during a well-earned winter furlough.

A small hospital has been erected at the Stony Indian Agency at Morley, Alberta, where a full-time medical superintendency was established in the previous year. This band of Assiniboine Indians occupies a large reserve at the foot of the mountains between Calgary and Banff. The soil is almost entirely coarse gravel and cannot be cultivated. It provides fairly good grazing for a limited number of beef cattle, not sufficient to adequately support the popula-These Indians have always had a severe economic struggle, and, as a consequence, have made less progress than many other bands more fortunately They were later than other bands in passing the peak of their decline from tuberculosis. Infant mortality was phenomenal, in some years almost complete. From 1919 to 1924 they decreased by 14, from 621 to 607; in 1929 they had increased by 4 to 611; in 1934 they numbered 684. While undoubtedly several factors have contributed to their improvement, it is significant that a nurse was stationed at the reserve in 1927, and that whereas they lost almost every one of their babies in 1926-27, they raised nearly all of them in the next and subsequent years. They now have a medical superintendent and a hospital of their own, and the department feels somewhat less anxious as to their future.

Obvious progress is being made in the battle against trachoma. Begun in the midst of the financial depression this service, for lack of funds, has not been developed as rapidly as the Department would have wished. It has had, however, the advantage of the direction of an exceptionally well qualified, industrious and diplomatic eye specialist, and of the most careful co-operation of the principals and staffs of the residential schools, and of local medical officers attending schools and reserves. It is gratifying to be able to report that the number of acute cases of trachoma in the schools has greatly diminished. does not mean that the disease is nearly conquered. There is a great deal of practically unreachable trachoma among the older people on the reserves, many of the young children coming into the schools are affected, and undoubtedly some of those whose eyes have been cleared up in school will forget their training and become reinfected after discharge. Their treatment and training in school, however, is bound to be of great value. They will protect themselves better, will recognize the disease in early form in their children and neighbours, submit more readily to treatment, and know how to carry out directions intelligently. The department anticipates a long struggle, but is very hopeful of the final outcome.

In the field of tuberculosis, the situation is not to be judged entirely by the adverse criticism in the public press. While such criticism is not unwelcome, as a means of arousing the public to a sense of its danger from Indian tuberculosis,

in justice to the department it is only fair to say that the serious nature of the problem is clearly realized, and that plans are ready for a definite onslaught when financial conditions improve. In the meantime, tuberculosis is not increasing among the Indians at large. It is visibly decreasing, though the rate of decrease is not satisfactory.

In spite of an almost complete lack of funds available for health work outside the immediate care of acutely sick Indians, some useful measures have been taken over the past few years to deal with tuberculosis in localized areas. In this connection the department wishes to acknowledge its gratitude to the antituberculosis organizations of the various provinces, which have provided diagnostic survey teams, partly and in some cases, wholly, at their own expense.

A large number of residential schools have been surveyed and resurveyed. The pupils are all examined, and most of them, at any rate all who are suspected of being tuberculous, are subjected to X-ray examination. They are divided finally into several grades, ranging from the definitely tuberculous, who are quite unfit for school life, to definitely clear of active tuberculous. The latter class present no problem, but there are two groups of tuberculous children whose disposal, under present circumstances, is difficult. First, there are those who should be admitted to sanatorium, but for whose maintenance in such an institution the department has no funds. Second, there is a considerable group who are unfit for ordinary residential school life, but who could continue their education in a school having some special provision for their care, an institution midway between a residential school and a hospital. There would appear to be a possibility of working out something along this line without disturbing the present system of operating the residential schools.

Notwithstanding these difficulties, these surveys have proven of great and unexpected advantage. The school principal and his local medical adviser have the benefit of the advice of a competent specialist, their interest is aroused, and after two or three visits by the survey team, a great improvement is apparent. In comparison with the cost this service is one of the most valuable within

present reach.

The areas where residential schools are not the prevailing factor in the situation appear to fall into two separate groups. In eastern Canada, and to some extent in British Columbia, there are many reserves where the children live at home and the living conditions of the Indians resemble those of their white neighbours. Some of these Indians have built up a comparatively high degree of resistance to tuberculosis. There are not many active cases among them. It would be possible at moderate cost to eradicate, or at least control, the disease by sanatorium treatment. In other bands, the incidence is higher and does not appear now to be decreasing. The financial problem in these latter bands is greater, but in all this group the only available effective remedy is isolation in sanatorium.

The other class comprises those Indians living in the far north, and in some parts of British Columbia, where primitive conditions obtain, the food supply is relatively uncertain, the tuberculosis rate is very high with no apparent improvement over several years. It is by no means obvious what can be done for these people. Their birth rate is high, they are raising their babies more successfully than they formerly did, they are free from many diseases which cause death in more settled regions, and they are as numerous as the country in which they live can support. They do badly when confined in hospital or sanatorium.

It may be well to include a short reference to the experience of the department in operating a system of public medicine. It employs, either regularly or fairly frequently, some 500 doctors and dentists at whole or part-time work, has several hospitals of its own, a small field nursing service and maintains sick Indians constantly in about 200 different public hospitals. It supplies drugs widely, both by central purchase and local prescription. It engages, in fact, in

every activity affecting the individual and community health of about 112,500

people living in some 800 separate communities.

It is beyond the scope of this report to go into this subject at any length. As to its effectiveness, it may serve to say that this service, even in the late difficult times, has been made and kept available for every acute case of illness and accident, and that substantial if not generous payment has been made for every service rendered by a professional man and hospital with the department's knowledge and consent, a condition which, in practice is quite liberally interpreted.

This service is managed at Ottawa by a Director of Medical Services with four lay assistants, receiving total salaries of approximately \$10,000 per annum. Its cost for services actually rendered to sick Indians was as follows during the

twelve months ending March 31, 1934:-

| | Whole cost | | Per c | apit | a |
|---|------------|--------|-------|------|-----|
| | \$ | cts. | \$ | ct | ts. |
| Professional services, including those of nurses and dentists | | 00 00 | | 3 | 45 |
| buildings belonging to the department | | 00 00 | | 5 | 10 |
| Drugs, and other related supplies | 70.0 | 00 00 | | Ō | 64 |
| of automobiles | 40.0 | 00 00l | | 0 | 36 |
| Other minor costs, such as freight, etc | | 00 00 | | 0 | |
| | 1,080,0 | 00 00 | | 9 | 60 |

EDUCATION

During the year 79 residential schools, 262 day schools and 10 combined Indian and white schools were in operation—a total of 351 centres of Indian educational activity. The total enrolment was 17,560 and the average attendance 13,442—a percentage of attendance of 76.54. The enrolment for the year is the largest and the attendance the highest yet reached. In Part II of this report will be found a tabular statement showing the location and indicating the attendance at all Indian schools. The same number of residential schools were in operation last year and the results have been very encouraging.

Efforts were continued, during the year, to secure efficiency in both the residential and day schools. Many fully qualified teachers and instructors are engaged and equipment is maintained to standard. All residential schools had an enrolment of pupils to full capacity. The Indian parents more and more realize the benefits of education and are anxious to place their children in the

residential schools.

The co-operation of the churches in the management of the residential schools was as follows:—

| Roman Catholic | 44 re | sidenti | al schools |
|---------------------|-------|---------|------------|
| Church of England | 20 | 44 | 44 |
| United Church | 13 | " | " |
| Presbyterian Church | 2 | " | " |
| | | | |
| | 79 | " | " |

Six new day schools were established, where there was promise of real usefulness. On many of the reserves, the Indian day schools secure as good an attendance and results as rural white schools.

Provincial curicula for public and separate schools are followed and fully qualified teachers are engaged. In addition to the regular academic work at all Indian schools, there is the very important vocational training at the residential schools.

Under arrangement with the provincial Departments of Education, the services of regular public and separate school inspectors are utilized, except in the provinces of New Brunswick and British Columbia, where there are special Indian school inspectors. In addition, there is medical inspection and department officers give constant supervision.

Continuation and high school work is taught at several of the day and residential schools. The more advanced pupils in those residential schools that are situated close to municipal collegiates are benefited by secondary training in competition with white children. There were approximately 200 Indian students, not shown in the tabular statements, attending public schools, high schools and colleges in Canada. The department assists them with a grant from parliamentary appropriation.

The practice of assisting the most promising and industrious graduates of Indian schools was continued. Except in those Indian communities where successful farming is found, the school graduate presents a problem which is very difficult of solution. The department and the churches interested are continually trying and searching for better methods of helping the young people

to establish themselves.

New main buildings were commenced during the year at two residential schools—Sault Ste. Marie, Ont. (Shingwauk Residential School) and Lebret, Sask. (Qu'Appelle Residential School). An addition is being erected to the residential school at Morley, Alberta, to provide increased accommodation. All school buildings and equipment were kept in repair as far as funds permitted.

The expenditure for Indian education for the year shows an increase of \$35,690.97 as compared with the previous year. The expenditure for Indian education from parliamentary appropriation for the fiscal year ended March 31, 1935, amounted to \$1,655,820.82, as follows:—

| INDIAN EDUCATION VOTE—EXPENDIT | URE FO | OR YEAR 1 | 1934-35 |

LANDS AND TIMBER

LANDS

The period of agricultural depression continuing throughout the fiscal year 1934-35 increased very considerably the work of administration of Indian lands throughout the whole Dominion. The large wheat-growing sections in the western provinces were, of course, most adversely affected, and as during the previous fiscal year, collections were much below normal, and the department was called upon in numerous cases to grant further extensions. It is believed that many land purchasers have now become so heavily in arrears of both principal and interest payments that it will be impossible to meet in full eventually the terms and conditions of their contracts, but notwithstanding this fact,

the department has refrained from taking cancellation or repossession proceedings, except in cases where default has been deliberate and avoidable, or where the purchasers themselves requested that such action be taken. The market prices of various grains, especially wheat, continue to be under what is held to be the cost of production. This alone, however, is not the only handicap, as drought, hail, frost and various pests all took their toll throughout the western farming sections, with the result that in hundreds of instances, farmers were unable to make any payments whatsoever, on account of purchases, and in addition, found it necessary to go on relief for temporary sustenance and support.

It appears to be somewhat paradoxical, but even in the face of such a deplorable situation as prevailed generally, there continued throughout the year an active interest in Indian lands, and numerous quarter-sections were sold at satisfactory prices. In many instances also purchasers have been transferred to crop share leases, agreements of this type being considered more suitable to

existing conditions.

Indian Farming Operations

It is regrettable, but perhaps inevitable, that a further decrease in both yield and acreage must be recorded in connection with Indian farming operations during 1934-35. The very unsatisfactory results obtained in 1933-34 may be held responsible for the fact that during the past year there were 408 fewer Indians engaged in raising crops. Necessarily these have sown a smaller acreage and reaped a lower yield. There was an actual decrease of 11,336 acres cultivated, while the average yields of the principal grains were as follows:—

It will be noted that wheat shows a slight increase in average bushels per acre, while the coarse grains show substantial decreases. The outlook for the ensuing agricultural season is more promising, and the results, when recorded, will, it is hoped, indicate the turn of the tide. During 1934-35 the yields in Manitoba and Alberta were slightly above the average for the other provinces, while Saskatchewan yields were below. In the case of barley, Manitoba was also well below the average, and Alberta well above.

LIVE STOCK CONTINUE TO INCREASE

Much more satisfactory results are to be recorded with regard to cattle, there being a net increase in the Indian herds of 799 head, notwithstanding the fact that losses due to various causes have been heavy. A summary of reports received indicated that 1,102 head had died or been killed by accident, but there is some reason to assume that many of these were surreptitiously slaughtered for food by the Indians. During the past fiscal year 2,345 head were beefed for home consumption, and 2,137 head were sold for cash, so that in addition to the increase on the hoof, the Indians have obtained a very substantial part of their livelihood from their cattle. The number of cattle reported as "missing" was 935 head, and of these 266 were recovered. Undoubtedly a considerable number of these "missing" animals were slaughtered by the Indians for food, and without permit to do so. The total receipts were 7,970 head, of which 6,590 were born on the reserves, the remainder having been acquired by trade or purchase. Total issues were 7,161. The Indian cattle are all good grades, mostly Shorthorns, and a limited number of Herefords.

GRANTS TO EXHIBITIONS AND FAIRS

During the past fiscal year the department, in pursuance of existing practice and policy granted certain sums of money to various exhibitious and fairs throughout the Dominion, for the purpose, primarily, of encouraging the prosecution and development of Indian handieraft and the advancement of agriculture

among the more progressive Indians throughout the Dominion. The results were, as usual, uniformly satisfactory and encouraging, particularly in view of the fact that the greater portion of such grants as were made direct to exhibition associations were utilized for the purpose of offering prizes to Indian exhibitors, mainly of native handicraft. Considerable attention and recognition was also given to the work of pupils in Indian schools. The following were the grants made during the year 1934-35:—

| | \$ | cts. | |
|--|----|--------------|---|
| New Brunswick— | | | |
| Fredericton Exhibition, N.B | 2 | 5 00 |) |

| Chilliwack Fair | | 0 00 0 00 | |
| Vancouver Fall Fair | | 0 00 | |
| Armstrong Fall Fair | 30 | U U | J |

In addition to the foregoing, some \$1,500 was granted to the Kamloops Agricultural Association, under whose auspices exhibits are received from the Kamloops, Williams Lake, Nicola, Okanagan and Lytton Agencies.

LEASES AND LOCATION TICKETS

Under the provisions of the Indian Act during the fiscal year 1934-35 there were 158 leases and permits issued, and during that period there were 962 such leases and permits current. One hundred and twenty-nine location tickets granting title under the provisions of the Indian Act to individual owners, covering lands on the reserves, were issued, and at the present time 3,048 such location tickets are current.

Enfranchisement

During the past fiscal year one Indian, his wife and five minor, unmarried children, were enfranchised under the provisions of section 110 of the Indian Act; under the provisions of section 114 there were carried out thirty-one enfranchisements, the total number of men, women and children enfranchised under this section being 51.

TIMBER

A somewhat improved log market, especially in the province of British Columbia, and a better demand for timber products, generally throughout the Dominion, resulted in the cutting of nearly double the quantity of timber from Indian reserves during that past season, 1934-35, than in the previous year.

A corresponding increase in revenues was also registered but this was slightly offset by the fact that the department was compelled to waive collection of dues on timber cut by Indians of many reserves, as a measure of relief.

The kinds and quantities of timber cut for sale during the season 1934-35, on which royalties and dues were collected, were as follows:—

| Pine (white) | 7.555 | f.b.m. |
|------------------------------|-----------|--------|
| Pine (yellow) | 638, 234 | 66 |
| Pine (red or Norway) | 31, 128 | ** |
| Spruce (various) | 4.913.748 | ** |
| Hemlock (western) | | " |
| Hemlock (eastern) | | |
| Cedar (white) | 40,026 | " |
| Cedar (red) | 315,022 | " |
| Fir (Douglas) | 7,932,770 | " |
| Fir (balsam) | 750,052 | |
| Maple | 437,743 | |
| Walnut | 535 | " |
| Birch | 104,722 | " |
| Elm | 5,964 | " |
| Oak | 169,638 | " |
| Basswood | 20.748 | " |
| Poplar | 63,924 | " |
| Cottonwood | 530,673 | " |
| Cordwood (mixed) | 5,551 | cords |
| Pulpwood (spruce and balsam) | 10,370 | 44 |
| Shingle bolts | 76 | " |
| Ties | 19.875 | |
| Poles | 255 | |
| Posts | 1,598 | |
| Piling (lineal feet) | 45, 169 | |

The above quantities expressed in terms of board measure feet represent a cut of approximately 25,000,000 f.b.m. but an additional quantity of 12,000,000 f.b.m. was cut by the Indians free of dues, while a further quantity estimated at 8,000,000 f.b.m. was cut by them for building, fencing and fuel purposes.

Revenue receipts during the year were as follows:-

| Bonus payments on timber\$ | 5,525 | 00 |
|----------------------------|--------|----|
| Licence royalties and dues | 34.688 | 56 |
| Permit royalties and dues | 13,343 | 54 |
| Rentals from licences. | 1.543 | 10 |
| Licence fees | 606 | 00 |
| Interest payments | 994 | 30 |
| Trespass dues | 116 | 88 |
| Fines | 29 | 00 |
| Deposits on timber sales. | 5,160 | |
| Total\$ | 62,006 | 38 |

Sales of timber during the year were as follows:-

| Clatux and Fishery Reserves, B.C | Deposit | \$ 360 00 |
|----------------------------------|---------|-----------|
| Malachan Reserve, B.C | ., | 450 00 |
| Wawwatl Reserve, B.C. | " | 200 00 |
| Katit Reserve, B.C | 44 | 4.000 00 |
| Meetup Reserve, B.C. | " | 100 00 |
| Keogh Reserve, B.C | " | 50 00 |
| | - | £ 100 00 |

There were eighteen timber licences current, being two more than the previous year, four new licences having been issued, one suspended, and one terminated.

FOREST PROTECTION

Although the number of forest fires occurring on Indian reserves in 1934 was about the same as in the previous year, the amount of damage sustained was considerably less, and the cost of extinguishing such fires was about one-half of that incurred during the past season.

A summary of the salient features with regard to forest fires during 1934, is shown hereunder:—

| Total number of fires reported | 34 |
|------------------------------------|----------------|
| Total area burned | 2,180 acres |
| Timbered area burned | 1,594 " |
| Area of second growth burned | 271 " |
| Area of cut over lands burned | 315 " |
| Quantity of log timber destroyed | 477,000 f.b.m. |
| Quantity of other timber destroyed | 2,835 cords |
| Value of timber and wood destroyed | 2,742 |
| Value of other property burned | 23 |
| Cost of fire fighting | 2,333 30 |

FOREST FIRE CLASSIFICATION

| Size of fire | | Monthly occurrence | |
|--|-----------------------------|---|------------------------------|
| "A" class, less than 1 acre "B" class, less than 10 acres "C" class, less than 100 acres "D" class, less than 500 acres "E" class, more than 500 acres | 7 16 7 2 2 2 | May June July. August September | 8 4 7 13 2 34 |
| Cause of fire | | Locality | |
| Indians. Campers. Brush burning. Smoking. Lightning. Unknown | 4 7 3 9 6 5 | Ontario Saskatchewan British Columbia | 23 1 10 34 |

The department does not maintain a fire-fighting organization other than as represented by a few Indian fire rangers, but arrangements have been made with the various provincial governments, whereby forest fires on Indian Reserves are extinguished by the provincial forest service.

I would again emphasize the necessity of providing a special item of \$5,000 in the estimates, for forest protection so that funds will be available to defray the cost of extinguishing fires on reserves which belong to Indians who have no band funds.

MINING

The revenue derived from mining, including the removal of sand and gravel was more than double the previous year. This is accounted for by the activity in road construction and the consequent demand for gravel and fill-in material.

Such revenue is summarized as follows:—

| Royalty on mining leases | 195 | 14 |
|-------------------------------|-------|----|
| Royalty on gravel, cte | 4,033 | 85 |
| Reatal mining leases | 400 | 00 |
| Rental mining permits | 1,872 | 00 |
| Prospector's permit fees | 527 | 00 |
| Compensation paid for Indians | 275 | 00 |
| Thatal | 7 209 | 60 |

CONSTRUCTION AND MAINTENANCE OF ENGINEERING WORKS

The following engineering works were carried out during the fiscal year 1934-35 —

BRIDGES

Repairs and construction of bridges were undertaken on the following reserves:—

Fort William, Walpole Island, Oneida and Six Nations in Ontario, and Upper Similkameen No. 3 in British Columbia.

DRAINAGE SYSTEMS

Drainage works were carried out on the following reserves for the improvements of farm land:—

Sarnia, Moravian and Rama in Ontario and Caughnawaga, in Quebec.

DYKING-BREAKWATER

Dyking and breakwaters were constructed or repaired on the following reserves:—

Nanaimo No. 3, Nicola and St. Mary's Reserves in British Columbia.

Breakwaters were constructed at the McIntyre Bay Reserve, Ont., and Middle River Reserve, Nova Scotia.

IRRIGATION

Irrigation systems were constructed, extended, improved or repaired in order to gradually increase farming operations on the following reserves in British Columbia, and other preliminary works were carried out to hold water rights held by the department under conditional licences with the British Columbia Government:—

Kamloops Indian Reserve No. 1, Little Shuswap No. 5, Deadman's Creek, Neskainlith, Sahhaltkum, Columbia Lake, Shuswap, Mamette No. 1, Cook's Ferry, Salmon River No. 1, Bonaparte, Osoyoos No. 1, Soda Creek No. 2, Dog Creek, Anaham No. 1, Inkitsaph, Boothroyd, Okanagan No. 9, Penticton No. 1, Lytton No. 2, Canoe Creek.

ROAD WORK

Improvements, maintenance and repairs were carried out on highways, and ordinary roads, directly by this department or with the co-operation or assistance of Provincial governments on the following reserves:—

Ontario.—Cape Croker, Six Nations, Golden Lake, Alnwick, Saugeen, Rama, Rice Lake, Mud Lake, Cockburn Island, Walpole Island, Sarnia, Michipicoten, Spanish River, Caradoc, Moravian, Kettle and Stony Point, Parmachene, Pic River, Port Arthur and Tyendinaga.

Quebec.—Ouiatchouan, Bersimis, Caughnawaga, Abenakis, Restigouche, Maniwaki, St. Regis, and Timiskaming.

Alberta.—Blackfoot.

Manitoba.—Fisher River, Peguis and Brokenhead.

Saskatchewan.—Piapot, Pasqua and Muscowpetung.

Nova Scotia.—Bear River, Whycocomagh, Malagawatch, and Sydney No. 28.

New Brunswick.—Tobique and Devon.

British Columbia.—Musqueam.

WATER SUPPLY SYSTEMS

Water supply systems were constructed, improved or repaired at the following Indian villages in British Columbia, for domestic purposes or fire protection:—

Thaltan, Canoe Creek, Bella Bella, Skwah No. 1, Lytton No. 18.

Artesian wells were sunk at Fishing Lake, Sask., Woodstock, N.B., Indian Brook, N.S., and Samson, Alta.

WHARVES

Repairs were made to docks and wharves at Klemtu, B.C., and Gull Bay, Ont.

SURVEYS

Owing to the small amount allotted for surveys during the fiscal year ending March 31, 1935, the work was confined to such surveys as demanded immediate attention. The following surveys were performed:—

British Columbia-

S. Saanich I.R. No. 1. A survey was made in connection with a proposed exchange of land.

Saskatchewan-

Cowesses Indian Residential School. A road survey was made through the school property.

Manitoba-

St. Peters I.R. No. 1. Subdivision of the surrendered hay lands was commenced.

Ontario-

Garden River I.R. No. 14. The West boundary of the reserve was re-established.

Sioux Lookout Indian Residential School. The boundaries of the School property were surveyed.

Sucker Creek I.R. No. 23. A subdivision was made of Lots 12 to 15,

Con. 8.

Grand River. Certain Islands in the Grand River in front of Lots 60 and

61 Township of Oneida were surveyed.

Rice Lake I.R. No. 36. The boundaries of Lot 7, R. 7, Tp. of Otonabee were re-established; a portion of the lot was subdivided for summer resort sites and a road through the lot was surveyed.

Rama I.R. No. 32. A subdivision was made of Lots 15 and 16, Con. 6. Cornwall Island No. 9. The Easterbrook Farm was subdivided.

Quebec-

Caughnawaga I.R. No. 14. Subdivisions were made of Lots 195, 367, 381 and 590.

BUILDINGS

Under the Public Works Construction Act of 1934 two new Indian Residential Schools were commenced, one called the Shingwauk Indian Residential School at Sault Ste. Marie, Ont. and the other called the Qu'Appelle Indian Residential School at Lebret, Sask.

The Shingwauk Indian Residential School is to provide suitable accommodation for the children of that district, the old School having outlived its usefulness

The Qu'Appelle Indian Residential School is to replace the one destroyed by fire.

A small Hospital is under construction on the Stony Indian Reserve at Morley, Alta., and alterations and additions are being made to the Morley Indian Residential School on the same reserve.

Repairs were made to our agency buildings to the extent of the funds provided.

A residence was erected for the Medical Superintendent at Muncey, Ont., and a residence was also built for the Indian Agent in the Edmonton Agency.

SUMMARY OF INDIAN AFFAIRS BY PROVINCES AND TERRITORIES

The local administration of Indian bands, on the reserves scattered throughout the Dominion, is conducted through the department's agencies, of which there are in all 117. The number of bands included in an agency varies from one to more than thirty. The staff of an agency usually includes various officers, in addition to the agent, such as the medical officer, clerk, farm instructor, field matron, nurse, constable, stockman and others, according to the special requirements of the agency in question. At many of the smaller agencies in the older provinces, where the Indians are more advanced, the work is comparatively light, requiring only the services of an agent. The work of the agencies is supervised by the department's inspectors.

ONTARIO

Agencies.—The Indian Agency offices in Ontario are located as follows: Brantford (Six Nations), Cape Croker, Chapleau, Chippewa Hill (Saugeen), Christian Island, Deseronto (Tyendinaga), Roseneath (Alnwick), Fort Frances, Gore Eay, Hagersville (New Credit), Highgate (Moravians), Kenora, Longford Mills (Rama), Manitowaning, Moose Factory, Muncey (Caradoe), Parry Sound, Feterborough (Rice and Mud Lakes), Fort Arthur, Port Perry (Scugog), Golden Lake, Sarnia, Sault Ste. Marie, Sutton West (Georgina and Snake Island), Sturgeon Falls, Thessalon, and Walpole Island.

Tribal Origin.—The great majority of the Indians of Ontario are Ojibwas, and are of Algonkin stock. The Oneidas of the Thames, the Mohawks of the Bay of Quinte, the Mohawks of the Parry Sound district, and the Six Nations of the Grand River, are of Iroquoian stock. There is a band of Pottawattamies at Walpole Island, and Delawares at the Caradoc (Muncey) agency; these are of Algonkin stock.

Occupations.—The Indians in the southwestern and central parts of Ontario engage largely in farming. The reserves generally are well suited to this purpose and the activity of the department's field agents has resulted in a steady improvement both in the methods of operation and the results achieved.

During the summer months Indians find a profitable source of income as guides and canoe-men. Others are employed at various industries and trades, The Indians are proficient bushmen and many find employment in the various lumber camps. There is still a market for snowshoes, canoes, and moccasins, and these are usually manufactured by the older members of the community.

The women also find sources of income; some are employed as domestics; others support themselves by making baskets and fancy work. In certain districts berry-picking is an important item and furnishes considerable income. In the more settled districts many of the Indians own houses of brick, stone or modern frame construction and on some reserves both houses and farm buildings are comfortable and well built. In the outlying and more remote parts the old type of log houses still predominate and tents and tepees are used during the summer months.

New Ontario.—In the remote parts of Ontario hunting and fishing are still the chief sources of livelihood. Acting as guides and canoe-men during the summer months adds considerably to their income. While agriculture is not carried on to any extent, most of the bands grow considerable crops of potatoes and vegetables. They are, of necessity, more or less nomadic and consequently live in tents most of the year.

QUEBEC

Agencies.—The following agencies are included in the province of Quebec: Becancour, Bersimis, Caughnawaga, Gaspe, Pointe Bleue, Lorette, Maria, Mingan, Oka, Maniwaki, Restigouche, Seven Islands, St. Augustin, St. Regis, Pierreville, Timiskaming and Cacouna.

Tribal Origin.—The principal tribes found in Quebec are: Iroquois at Caughnawaga, Lake of the Two Mountains, and St. Regis; the Hurons of Lorette are also of Iroquoian stock; the Montagnais, who are of Algonkin stock, at Bersimis, Mingan, Lake St. John, Seven Islands; the Abenakis, also of Algonkin stock, at Becancour and St. Francis; the Micmacs, also of Algonkin stock, at Maria and Restigouche; and the Malecites, also of Algonkin stock, at Viger.

Occupations.—In the agricultural districts of the province the Indians engage in mixed farming. In the Gaspe peninsula the Indians find employment in the lumber camps and mills, but on the north shore of the gulf, fishing, hunting and trapping are still the principal sources of income. In the northern part of the province lumbering is the chief pursuit. One of the principal industries of the Indians of Quebec is making baskets, and many of the Indians spend the summer months at the resorts in order to dispose of the baskets, lacrosse sticks, racquets, moccasins and other articles to the tourists. Some of them, particularly in the Saguenay district, act as guides and canoe-men. The Indians of the large Caughnawaga reserve situated near Montreal are expert steel workers and find highly profitable employment when building operations are active.

Dwellings.—In the older settled districts of the province many of the Indians own stone, brick or frame houses of good construction, comfortable and sanitary. In the more remote districts, where hunting and trapping are still the principal occupations, the Indians necessarily live in tents during a great part of the year.

NEW BRUNSWICK

Agencies.—There are three agencies in the province of New Brunswick, the Northeastern, located at Richibucto, the Northern, located at Perth, and the Southwestern, located at Fredericton.

Tribal Origin.—The majority of the Indians of New Brunswick belong to the Micmac race, which is of Algonkin stock. In addition to these there are some bands of Malecites, also of Algonkin stock.

Occupations.—The Indians of New Brunswick are among the least progressive in the Dominion. Their farming operations are restricted mostly to the growing of potatoes for their own use. Formerly they derived a substantial income from hunting and trapping, but in later years this has dwindled to an almost negligible amount owing to the scarcity of fur-bearing animals. A considerable number find employment in the lumber camps and others as day labourers. In the southern part of the province the Indians are engaged commercially in the manufacture and sale of Indian wares.

Dwellings.—The dwellings of the Indians in New Brunswick for the most part are small, of poor construction and indifferently kept. In recent years, however, the department has been endeavouring to improve the situation, both by assisting in the repair of existing houses and, in some cases, providing new ones.

Nova Scotia

Agencies.—There are nineteen Indian agencies in the province of Nova Scotia, namely: Yarmouth, Digby, Shelburne, Lunenburg, Annapolis, Kings, Queens, Windsor, Shubenacadie, Halifax. Cumberland, Colchester, Pictou, Antigonish-Guysboro, Richmond, Inverness, Victoria, Sydney and Eskasoni.

Tribal Origin.—The Indians of Nova Scotia are of Algonkin stock, and bear the distinctive name of Micmac.

Occupations.—They follow various occupations, but, as a rule, do not confine themselves to any particular one. Many of them are engaged in farming. Those living near industrial centres sometimes work as day labourers. Hunting, trapping, and acting as guides for sportsmen are favourite occupations, more especially with Indians of middle age. Basket-making and the manufacture of fancy moccasins, etc., are confined mostly to women. A profitable employment among Indians in some parts of Nova Scotia is the manufacture of hockey sticks.

Dwellings.—With very few exceptions, Indians in Nova Scotia occupy houses of frame construction, well finished on the outside, but unfinished inside. Every settlement, however, has a few comfortable dwellings well finished throughout. Other buildings owned by Indians—harns and storehouses—are mostly of frame construction also.

PRINCE EDWARD ISLAND

Agency.—Che agency is sufficient for the purposes of the department in this province. It is located at Grand River.

Tribal Origin.—The Indians of this province all belong to the Micmae tribe, which is of Algonkin stock.

Occupations.—But few of the Indians of Prince Edward Island are farmers. The principal industries are basket-making and fishing.

Dwellings.—The Indians live in small frame houses.

MANITOBA

Agencies.—The following agencies are included in the province of Manitoba; Birtle, Clandeboye, Fisher River, Griswold, Portage la Prairie and Manitowapah, Norway House, Pas, Fort Churchill and York Factory.

Tribal Origin.—The majority of the Indians of Manitoba belong to the Ojibwa race, which is of Algonkin stock. Bands of Swampy Crees are found at the Norway House and Fisher River agencies and in the York Factory district; these are also of Algonkin stock. The Indians located at the Griswold agency are Sioux; there are also Sioux at the Birtle and Portage la Prairie agencies. There is a band of Chipewyans at Fort Churchill; this tribe is of Athapascan stock.

Occupations.—The reserves in Manitoba suitable for extensive agriculture are mainly within the Birtle, Griswold and Portage la Prairie agencies.

In the northern agencies the chief occupations are hunting, trapping and fishing. Many of the northern Indians are expert guides and canoe-men. They are employed by sportsmen and to some extent by the transport and fur companies, although their revenue from the latter sources, which was formerly consideral le, has dwindled due to the introduction of air transport and other modern facilities.

In the southern and more settled districts some of the younger people find employment as day labourers. The Indian women make needle-work, baskets, and other articles.

Dwellings.—In recent years the Indians have adopted more sanitary methods of living. Their houses are more comfortably furnished and of better construction than formerly. In the north the Indians live in the old-fashioned

log house, but even these are being greatly improved and in some cases are being replaced by suitable frame dwellings.

SASKATCHEWAN

Agencies.—The following agencies are included in the province of Saskatchewan: Battleford, Carlton, Crooked Lakes, Duck Lake, File Hills, Onion Lake, Pelly, Qu'Appelle, and Touchwood.

Tribal Origin.—The most numerous tribes among the Saskatchewan Indians are the Ojibwas, Swampy Crees, and Plain Crees, which all belong to the great Algonkin stock. In addition to these, Sioux Indians are found at the Crooked Lakes, Qu'Appelle and Carlton agencies, and on the Moose Woods reserve. In the Onion Lake agency there is a band of Chipewyans, who are of Athapascan stock. There are also a few Chipewyan Indians in the Ile à la Crosse district.

Occupations.—The principal occupations of the Indians of Saskatchewan are farming and stock-raising. The close supervision which the department has had over these Indians has greatly improved their methods of farming. Most of the Indian farmers are well provided with machinery and stock. In the outlying districts, however, hunting and trapping are still the main sources of income and will remain so until civilization encroaches upon the hunting grounds.

Dwellings.—The dwellings of the Indians on the reserves where farming is carried on are now mostly of frame construction. The outbuildings, however, are generally of logs. In the north most of the Indians live in log cabins and use tents and tepees in summer.

ALBERTA

Agencies.—The following agencies are included in the province of Alberta: Blackfoot, Blood, Edmonton, Hobbema, Peigan, Saddle Lake, Sarcee, Stony, Lesser Slave Lake, and Athabaska.

Tribal Origin.—The Alberta Indians are of Algonkin stock, with the exception of the Sarcees near Calcary and the Beavers and Slaves in the Lesser Slave Lake agency, who are Athapascan, the Paul's band in the Edmonton agency, who are Iroquoian, and the Stonies, who are of Siouan stock. The Algonkin Indians of Alberta are subdivided into Blackfoot nation, comprising the Indians of the Blackfoot, Blood and Peigan agencies; Plain Crees found in the Lesser Slave Lake, Saddle Lake, and Hobbema agencies.

Occupations.—The principal occupations of the Indians of Alberta are farming and stock-raising, in which, on the whole, they are remarkably successful. Almost all the reserves in the settled districts of the province have large herds of horses and cattle, and are well provided with agricultural machinery.

In the northern parts of the province hunting and trapping are still almost the sole source of income for this district. There is practically no farming carried on and the construction of steamers on the Peace and Athabasca rivers, and of the railways to Peace River Crossing and Fort McMurray and air transportation have greatly reduced the earnings of the Indians with the trading companies and transports.

Dwellings.—In the southern part of the province the dwellings and farm buildings on some of the reserves are of excellent construction and quality. Almost all the reserves where extensive farming is carried on boast of up-to-date modern dwellings, comfortable and well constructed. In the northern parts of the province the majority of the Indians live in log cabins and use tents and tepees during the summer.

BRITISH COLUMBIA

Agencies.—The following agencies are included in the province of British Columbia: Babine, Bella Coola, Cowichan, Kamloops. Kootenay, Kwawkewlth, Lytton, New Westminster, Nicola, Okanagan, Queen Charlotte. Skeena. Stikine, Stuart Lake, Vancouver, West Coast, Williams Lake and Fort St. John, the latter agency having been established to serve the needs of the Indians of the Peace River Block.

Tribal Origin.—The Indians of the Bella Coola, Cowichan, Kamloops. Lytton, New Westminster, Nicola, Vancouver and Okanagan agencies belong to the Salish tribes. The Kootenay tribe is located in the agency of the same name. The Kwakiutl-Nootka tribe is located at the Kwawkewlth and West Coast agencies, the Haidas, in the Queen Charlotte Islands: the Tlingits, in the Stikine; and the Tsimshians in the Skeena agency. The Indians of the Babine, Stuart Lake and Williams Lake agencies belong to the Athapascan race.

The Indians of the Peace River Block are Athapascan, with the exception of a small group of Saulteaux and Crees at Moberly Lake who are Algonkin.

Occupations.—The occupations of the Indians of British Columbia vary with their habitat. The Indians situated along the coast earn their livelihood principally by fishing. Many of them own their own motor launches, nets and gear, while others are supplied by the various canneries. Many of the Indian women are employed in the canneries.

In the lower and central inland parts of the Province farming operations are carried on, and, particularly in the irrigated districts grain, fruits of all kinds, and vegetables are raised with success and profit. A number of the Indian farmers have become well-to-do and in some instances are possessed of substantial personal estates.

In the Kootenay, Kamloops, Okanagan and New Westminster Agencies the Indians have large holdings of horses and cattle.

A considerable number of Indians, including many women are employed in the hop fields, in season, both in the south-western mainland of British Columbia and in the State of Washington. Their employers find them to be unusually patient, painstaking and regular in their picking which accounts for the special demand that exists for their services.

In the northern and remote parts of the Province the Indians still depend upon hunting, trapping and fishing for their livelihood.

Dwellings.—The best Indian houses in British Columbia are found on the north-west coast among the Haidas of Queen Charlotte Islands, the Tsimshians of Port Simpson. Netlakatla and Port Essington, and the Kwawkiutls of Bella Bella. These Indians appear to have a natural bent for carpentry and housing architecture. They build from their own plans and without departmental assistance, either supervisory or financial, commodious bungalows, well finished inside and out, of the most modern type that would be a credit to a prosperous suburb of any large city. The Indians of the West Coast of Vancouver Island also have roomy, well-ventilated and well-kept houses, although of a less pretentious character than in the first mentioned locality.

These Indians were accustomed aboriginally to dwell in large community houses and this may account for the unusual size and height of the rooms in their modern homes.

The women of these more northerly coast villages are experienced house-keepers and maintain a high standard of neatness and cleanliness.

Strangely the Salish Indians of the southern British Columbia coast in the vicinities of the larger cities of Vancouver and Victoria and who have been in closer touch with civilization, are backward and unprogressive in their housing

conditions by comparison with the north coast Indians above mentioned. Indeed the houses of the Indians of the south coast are for the most part little better than shacks and show little evidence of care or good house-keeping. There are, of course, exceptions in the case of a few progressive Indians who have good homes. The general standard, however, is low.

In the farming districts of the central and lower mainland, housing conditions among the Indians are fairly good although even here their dwellings are not to be compared with those on the north coast.

In the northern interior the Indians still dwell in primitive shacks and tepees.

NORTHWEST TERRITORIES

Agencies.—The department has now three agencies in the Northwest Territories, namely: Fort Simpson, Fort Resolution and Fort Good Hope.

Tribal Origin.—The principal tribes found in the Far North are the Slave, Hares, Loucheux, Sicannies, Dogribs, Yellow-knives, Chipewyans and Caribou Eaters. All these tribes are of Athapascan stock. The most northerly tribes are the Takudah, who extend to the Mackenzie Delta; and the Copper Mines, who are located along the Coppermine river. The territory occupied by these two last-named tribes is contiguous to that inhabited by the Eskimos.

Occupations.—These Indians depend almost entirely upon hunting and trapping for a livelihood. A few have been induced to cultivate small plots of potatoes. They own no horses or cattle, transportation being almost entirely by canoe along the great waterways, or by dogs in winter. They catch and preserve large quantities of whitefish for their own use and for consumption by their dog-trains in winter.

Dwellings.—These Indians live in log cabins, using tents and tepees during the summer.

YUKON

Tribal Origin.—The Forty-Mile, Blackstone, and Moosehide bands belong to the Takudah tribe. There is a band of Slavies at Lancing Creek who migrated from Fort Good Hope on the Mackenzie river; another band of Slavies, called Nahanies, is located at the headwaters of the Pelly river. All these Indians are of Athapascan stock. At Mayo, Selkirk, Little Salmon and Carmacks there are bands belonging to the tribe known as Stick Indians. Bands belonging to the Tlingit tribe are found at Whitehorse, Teslin Lake, Champagne Landing, and Carcross.

Occupations.—Hunting, trapping and fishing are the chief occupations of the Yukon Indians. The women also derive some revenue from the sale of moccasins and curios of various kinds, while the men are expert at making toboggans and snowshoes. Practically no farming is carried on owing to climatic conditions, but some of the Indians cultivate patches of potatoes and other vegetables for their own use.

Dwellings.—The Indians of the Yukon live in log cabins.

FINANCIAL

At the close of the twelve months ended March 31, 1935, capital of the Indian Trust Fund, which at the end of the preceding year amounted to \$13,602,564.74, had increased to \$13,810,673.68.

The amounts expended from the Consolidated Revenue Fund were as follows: Voted by Parliament for the purposes of the department, \$3,973,432.83 and annuities by statute, \$236.426.00.

On March 31, 1935, the balance to the credit of the Indian Savings Account for the funding of the annuities and earnings of pupils at industrial schools was \$248,233.02. Deposits and interest during the twelve months aggregated \$42,608.41, and withdrawals, \$37,206.31.

In Part II of the annual report which follows will be found statistical information concerning the Indians of Canada.

Your obedient servant,

HAROLD W. McGILL,
Deputy Superintendent General of Indian Affairs.
